DETAILED ACTION

Notice to Applicant

1. This communication is in response to the application filed on 9/16/03. Claims 1-90 are pending.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1 and 46 recite the limitation "the data management **units**". It is not clear as to what type of units Applicant's is referring to. There is insufficient antecedent basis for this limitation in the claims.

Double Patenting

4. Claims 1-45 and 90 of US Application No.10/605,223 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-46 and 92 of copending Application No. 10/605,228 as originally filed. Although the conflicting claims are not identical, they are not patentably distinct from each other because it is well settled that adding or deleting of an element and its function in claim 1 such as "including standardized reports, from the received data" is an obvious expedient if the remaining elements perform the same function as before. In re Karlson, 136 USPQ 184 (CCPA 1963).
5. In addition, claims 46-89 of US Application No.10/605,223 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being

unpatentable over claims 47-91 of copending Application No. 10/605,228 as originally filed. Although the conflicting claims are not identical, they are not patentably distinct from each other because it is well settled that adding or deleting of an element and its function in claim 1 such as “including standardized reports, from the received data” is an obvious expedient if the remaining elements perform the same function as before. In re Karlson, 136 USPQ 184 (CCPA 1963).

6. This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
